

**Date:19-July-2019**

**Location: North South University Study Hall**

**Information Update/Reminder:**

In the next 3 -4 weeks, we are going to work on a project Online Marketplace so that we need to discuss about this project. That's why we need to place a meeting.

Hope everyone have much knowledge about programming languages, unit test, coding convention and documentation.

**Decisions Needed:**

1. Which programming language every one shall use in this project.
2. Which tool we will use for unit test.
3. Which tool we will use for documentation.
4. Coding convention selection.
5. Who will check coding convention?
6. Who will check unit test and documentation?
7. When we will do unit test.
8. Who create documentation?
9. Design all user interfaces and implement it by using which Css framework.

**General Items:**

1. We need to add some new item on trello task board.
2. Need to design user interface first.
3. After decide the Css framework then we need to implement it.
4. After complete the user interface then we will start implement back-end.
5. Check coding convention and documentation.
6. After implement every functionality we have to do unit test.
